

Paul Walbridge

Credentials

October 17 2019

I will be accessible to constituents.

I will stand up for town residents.

I will fight to keep industrial wind turbines and solar plants out of the township. They don't belong in our rural, agricultural, small-business, tourist and sport-oriented community.

I will work to take down blighted homes.

One of my goals is to keep taxes low, beneath the NYS tax cap. To do this, we must bring in new business and keep it here.

Education: Two-year AA and four-year BA in communications/radio/TV broadcasting.

I retired after 32 years with the NYS Department of Corrections as a senior administrator in education.

I was on the Town of Malone board for many years, where I negotiated all the Town Highway Department contracts. I have a good working relationship with Bruce Mallette, and I believe I can work with him and his crew in maintaining and fixing town roads.

As a former town board member, I have worked well with Andy Stewart, Denise Hudson, and Bob Crossman. I can work with Terry McGuire & Candy Gadway. I have worked well with Judges Stone & Robert.

In the years I served on the town board, I was one of the councilors charged with establishing the budget, year after year.

I attended 22 out of 24 town board meetings per year. (In other words, I showed up and paid attention and was very much involved.)

I was in charge of the Recreation Park for the past several years, where I made major improvements. I have also been a baseball & football official for many years. One of my goals is to split the Rec Park Commission 50/50 with the Village of Malone. This will make for a far better organized program.

I have a reputation for making strong, educated decisions on tough matters.
